

SERIF TYPEFACE

Visage’s primary serif typeface is Georgia. It offers outstanding legibility and readability. It is used to display text, headlines and subheadings.

WEIGHTS

Georgia has 2 weights: Regular and Bold. It has matching italics for all weights

WEB AND SCREEN

Proxima Nova Normal is also available as web fonts to provide consistent typography styles across print and digital communications.

NOTE

The Extrabold and Black weights should be used sparingly. Do not use them for regular collateral material. They are suitable for headline type in large format applications such as advertising, posters or signage.
